

# 1. Configuring Web browsers for the Baltic languages

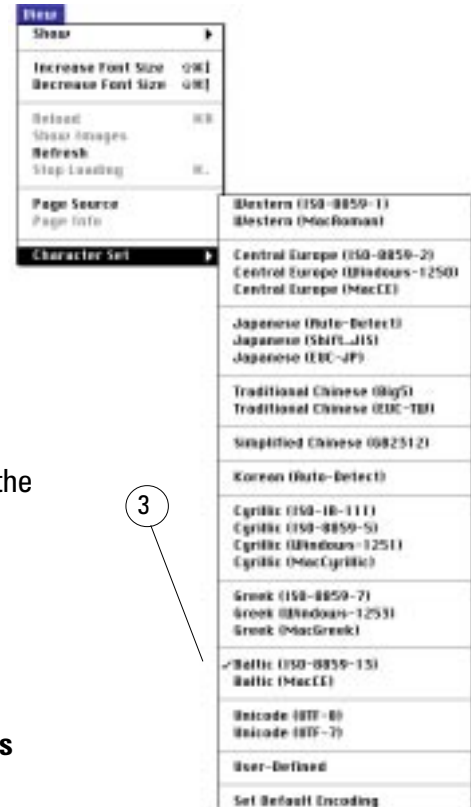

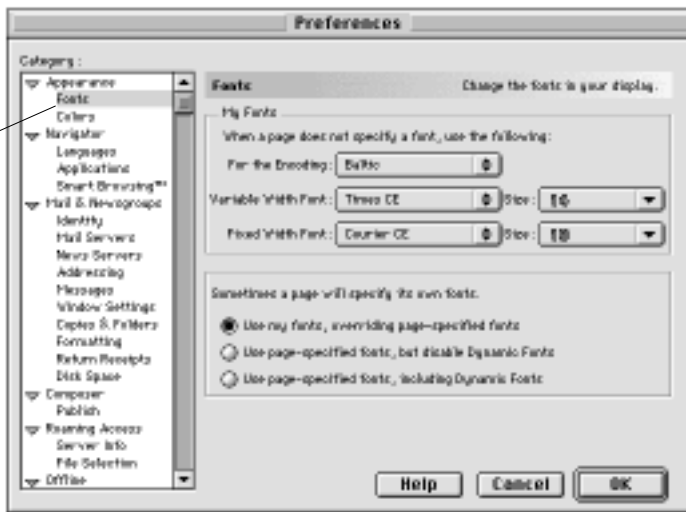

Netscape Navigator 4.08 for Macintosh

Mac OS 7.1  
Mac OS 8.x  
Mac OS 9.x

Before configuring Netscape Navigator 4.08 please ensure that you have installed the special Netscape 4.x Baltic patch software. For more details refer to the How To Series Guide **2. Installing the Netscape Baltic Patch**. You will also require at least one Apple CE font, (eg. Times CE, Helvetica CE) installed on your Macintosh system. Such fonts are included as part of the [Baltic Utilities](#) software package.

1. Start Netscape Navigator 4.08 and from the Edit menu choose the Preferences... command.

2. Click on Fonts and set the following parameters located in the My Fonts area:

|                      |            |
|----------------------|------------|
| For the Encoding:    | Baltic     |
| Variable Width font: | Times CE   |
| Fixed Width font:    | Courier CE |

Choose the **Use my fonts, overriding page-specified fonts** option. Click on OK to save your new preferences.

3. While visiting the desired Baltic Web page as a further check go to the **View** menu and **Character Set...** command and see that the **Baltic (ISO-8859-13)** option is checked.

4. Other popular Baltic Web sites to try are:

|                |   |
